Quote

“ "Because there are limits to the empowerment of consumers, there are limits to how well a private health market can function. And that's before you get to the question of the uninsured, to which the free market has no answer. Some degree of government intervention in health care is therefore inevitable and desirable. It is ideological nonsense to suggest that this intervention displaces an otherwise efficient private market." ”

Add or change this opinion item's references

This item argues for the position Program should be expanded on the topic State Children's Health Insurance Program.
