Quote

“ "Why be scared of a government health program? After all, the president says, "Medicare is a government program that works really well," and if "we're able to get something right like Medicare," we should have more "confidence" about being able to do it for everyone. On the other hand, the president says, Medicare is "unsustainable" and "running out of money." By the way, unlike your run-of-the-mill politician's contradictory statements, these weren't made a year or even a week apart, but during the same presidential speech in Portsmouth, N.H." ”
