Quote “ Wiping out net neutrality would have big consequences. Without it, your broadband provider could carve internet access into fast and slow lanes, favoring the traffic of online platforms that have made special payments and consigning all others to a bumpy road. Your provider would have the power to choose which voices online to amplify and which to censor. The move could affect everything online, including the connections we make and the communities we create. ”

Add or change this opinion item's references

This item argues against the position Net neutrality should be repealed on the topic Net neutrality in the United States.
