Quote

“ Florida’s broadband companies continue to support net neutrality and agree that rules prohibiting anyone from blocking, throttling, or unfairly discriminating against internet traffic should be in place. This core principle of an open internet experience for everyone is not controversial to the industry; it is the standard. However, the regulatory policies best-equipped to legally safeguard the spirit and principles of net neutrality should not look anything like antiquated utility-style policies. ”

Add or change this opinion item's references

This item argues for the position Net neutrality should be implemented via legislation on the topic Net neutrality in the United States.
