Quote

“ "When the Heritage Foundation did its analysis of Waxman-Markey, it broadly compared the economy with and without the carbon tax. Under this more comprehensive scenario, it found Waxman-Markey would cost the economy \$161 billion in 2020, which is \$1,870 for a family of four. As the bill's restrictions kick in, that number rises to \$6,800 for a family of four by 2035." ”
