Quote

66 No one denies that China has engaged in practices that harm American companies, such as theft of intellectual property and subsidies to state-owned companies. But the president gave up a powerful tool of leverage when he pulled out of the Trans-Pacific Partnership, which would have created a huge free trade entity of 12 nations. China would have felt pressure to seek admission, submitting to rules that would have compelled reform. Instead, Trump has tried to cow a Chinese government that increasingly relies on nationalism and resistance to foreign demands to maintain public support.
